

To whom it may concern –

RE – MB 18-184

I am in support of the MMTC and SSR Communications FM Class C4 / 73.215 proposal to allow eligible Zone II class A stations to upgrade in power from 6,000 watts to 12,000 watts. We listen to radio stations in the southern part of Colorado and are in favor of a clearer signal.

Pls implement the MB 18-184 proposal fully without delay. Many small broadcasters need this relief.

Thank you –

~Karen Owsley
